To,
Hiring Manager
Company Name
United Kingdom

Dear Hiring Manager,

I am writing to express my interest in the DevOps/Cloud Engineer position, as advertised. With **over five years** of hands-on experience in **cloud infrastructure management, CI/CD pipeline automation, and advanced cloud services on AWS, Azure, and GCP**, I am confident in my ability to contribute to your team's success.

Throughout my career, I have specialized in optimizing cloud environments and automating deployment pipelines to drive efficiency, reduce costs, and improve system reliability. At Lloyd's Bank UK, I automated deployment processes using Jenkins and Docker, which reduced deployment times by 40% and improved release accuracy by 25%. In addition, I implemented infrastructure-as-code solutions with Terraform, scaling cloud resources effectively and cutting provisioning time by 20%.

My ability to work cross-functionally has allowed me to collaborate with development teams to enhance CI/CD workflows and drive continuous improvement. As a **certified AWS Solutions Architect, Terraform Associate, and Kubernetes Administrator**, I have consistently delivered secure, scalable, and cost-efficient cloud solutions while maintaining high system availability.

I am excited about the opportunity to bring my skills in cloud infrastructure, automation, and DevOps practices to the Company. I look forward to the chance to discuss how I can contribute to your team's efforts in driving innovation and operational excellence.

Thank you for considering my application. I look forward to the opportunity to discuss how I can contribute to your team.

Sincerely,
NAGESHA KS
